## WORK EXPERIENCE

### Triumph

Dec 2022 - Present

Software Engineer

- WordPress, Faust.js, JavaScript, HTML, SCSS, React, Typescript, Next JS, PHP, Wamp Server, SQL, GraphQL, Atlas, Wrike
- Frontend Lead for headless CMS. Hard coded and built from scratch. Created a very successful project with new headless CMS called “The Wallet”. The wallet is a Venmo for the trucking industry and it has generated over a magnitude of capital for the company. Developed better UI and maintain banking applications for quality use. Rebuilt design themes/Plugins for banking applications to have better UI performance/ Safer and more responsive designs
- Update PHP files utilizing WampServer for new releases/ Build and configure WP blocks utilizing React, Faust and Next JS in headless CMS
- Configure settings with PHP on the backend to make it easier for the user to navigate and use themes without much assistance.
- Utilize GitHub to collab and process code with team.
- Communicate with team through Slack/ Manage projects through Wrike/ Azure Devops

### **Texas Christian University – contract CornerStone**
